

Installing Terraform on Windows

Step 1: Click on the link given below and select the operating system for which you want to download terraform

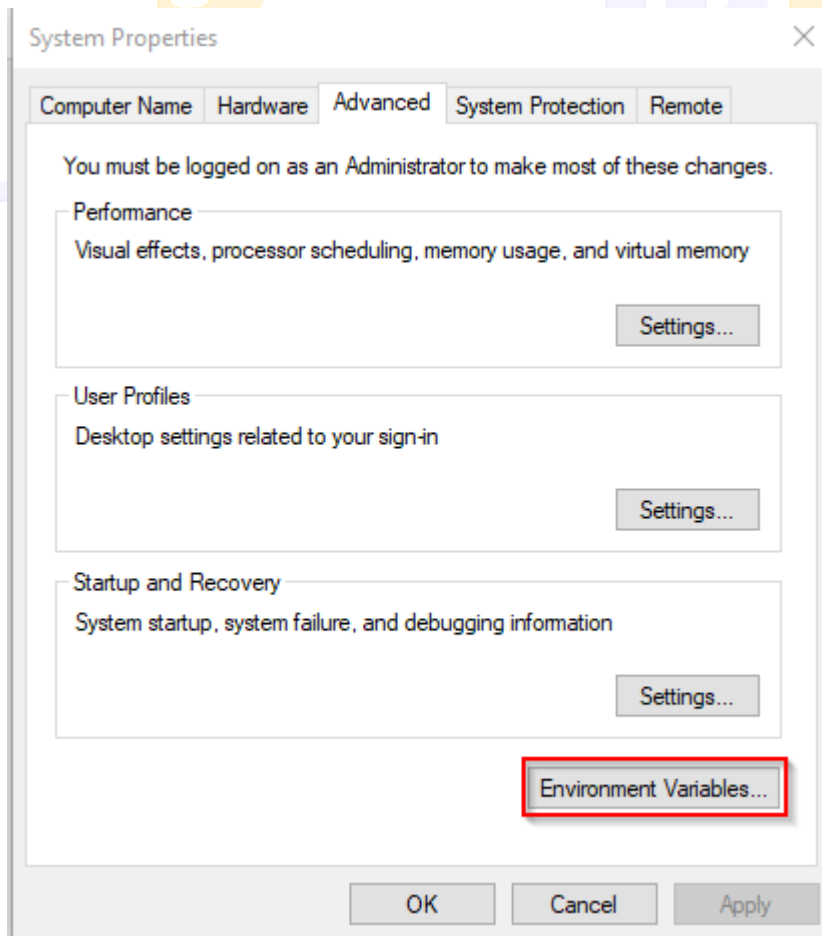

<https://www.terraform.io/downloads.html>

Step 2: Install Terraform

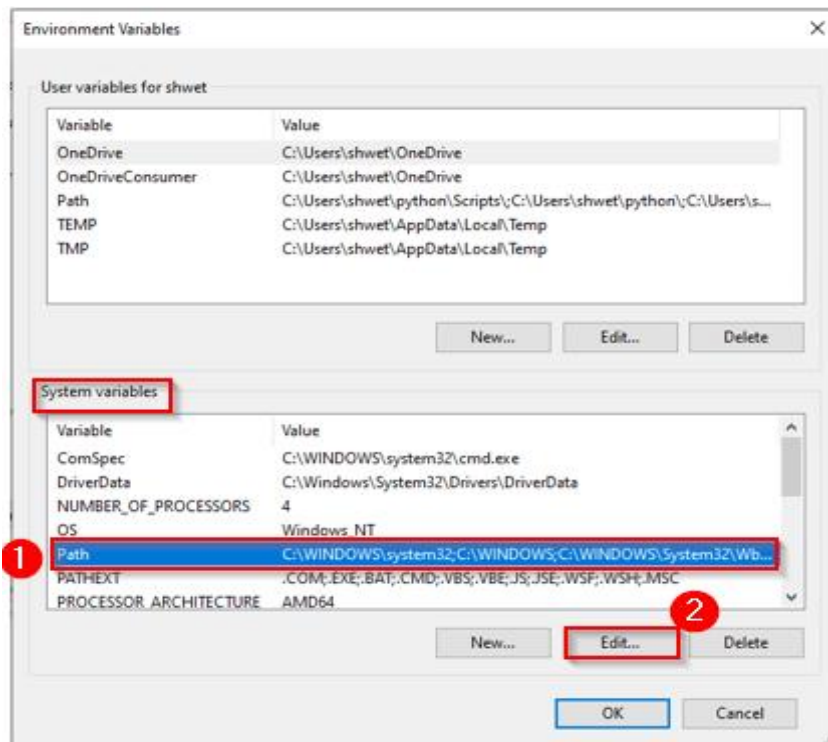

Double click on the terraform setup file and it will get installed

Step 3: Then setting up the environment variable

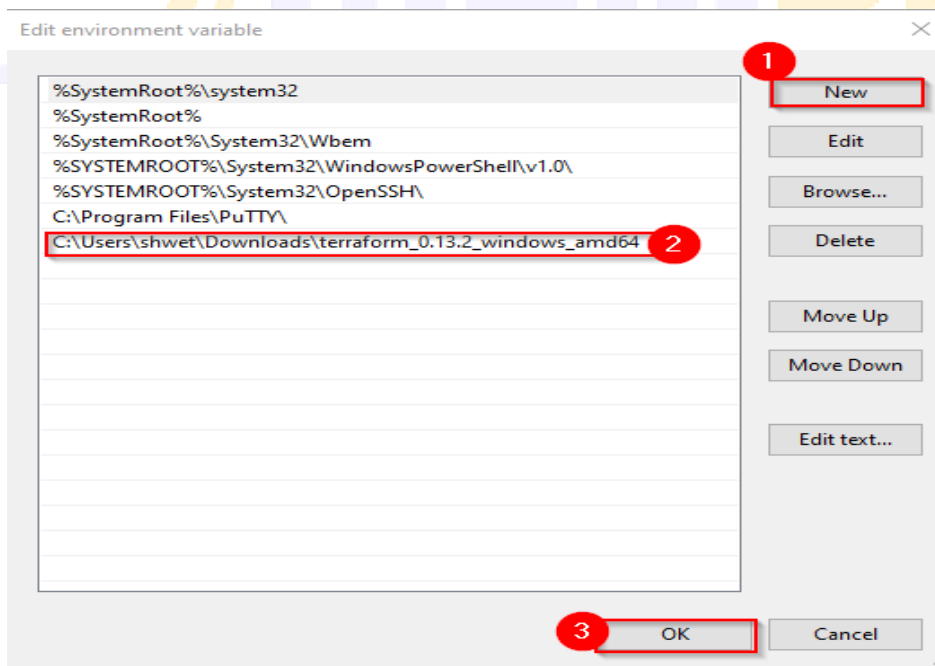

Go to control panel -> System ->Advanced system settings -> Environment variables

Step 4: Then under system variables pane, click on Path and then click Edit

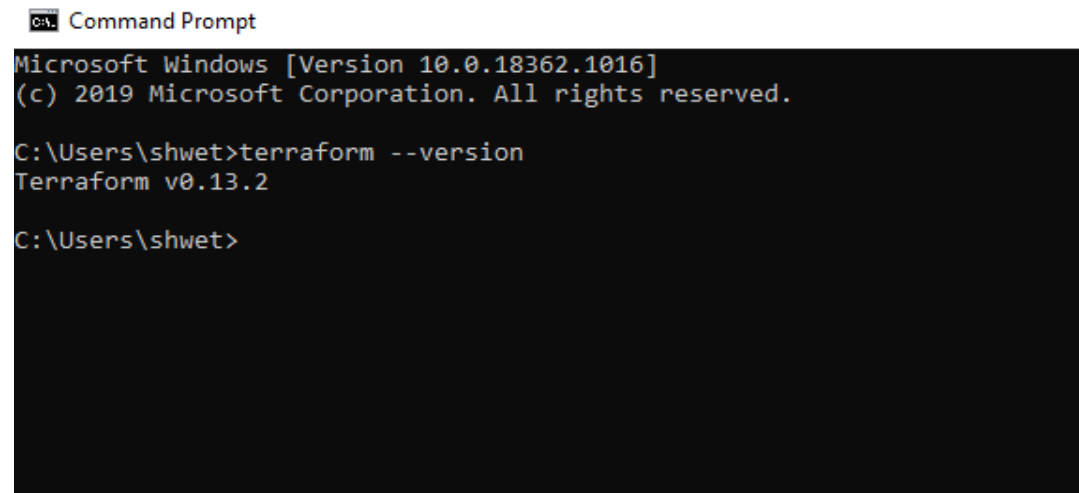

Step 5: Click new, copy the terraform file location and paste it. Then click ok

Step 6: Verifying whether it is installed or not

Go to command prompt and type:

terraform -version

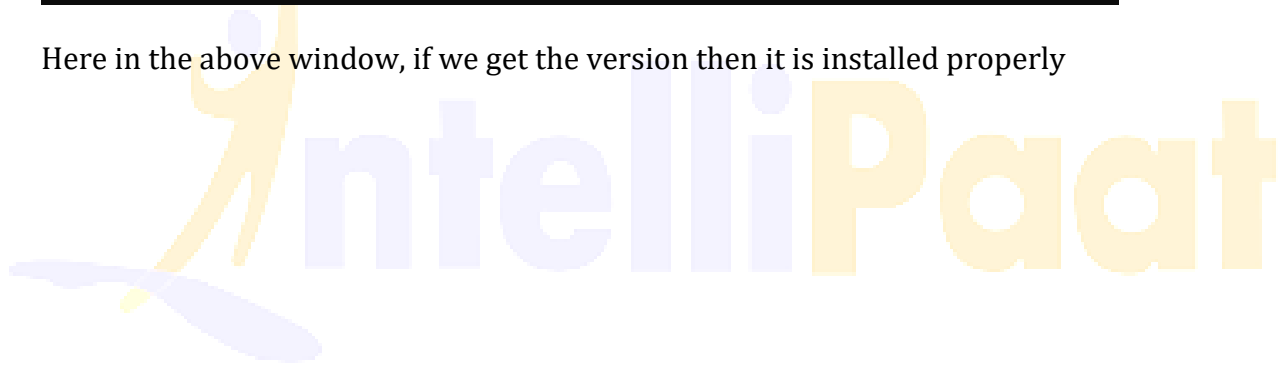

A screenshot of a Windows Command Prompt window. The title bar reads "C:\> Command Prompt". The window content shows the following text: "Microsoft Windows [Version 10.0.18362.1016]", "(c) 2019 Microsoft Corporation. All rights reserved.", "C:\Users\shwet>terraform --version", "Terraform v0.13.2", and "C:\Users\shwet>".

```
C:\> Command Prompt
Microsoft Windows [Version 10.0.18362.1016]
(c) 2019 Microsoft Corporation. All rights reserved.

C:\Users\shwet>terraform --version
Terraform v0.13.2

C:\Users\shwet>
```

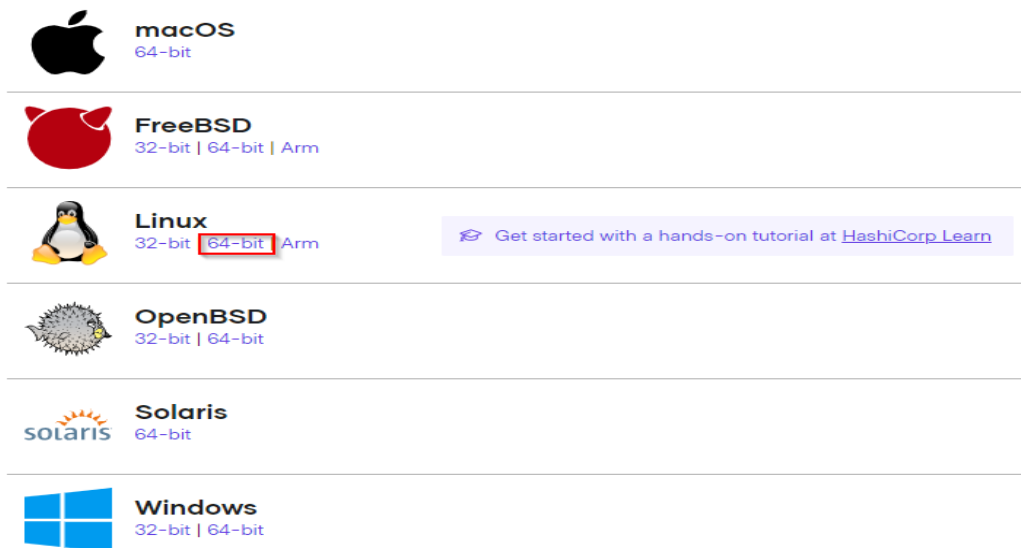

Here in the above window, if we get the version then it is installed properly

Installing Terraform on Ubuntu

Step 1: Open the link which is given below and copy the Linux 64-bit link

<https://www.terraform.io/downloads.html>

Step 2: Open the terminal, type:

Curl -O and Paste the link which u have copied

```
ubuntu@ip-172-31-7-235:~$ curl -O https://releases.hashicorp.com/terraform/0.13.2/terraform_0.13.2_linux_amd64.zip
```

Step 3: To unzip terraform, we will first download unzip using this command
sudo apt-get install unzip

Then type:

unzip terraform_0.13.2_linux_amd64.zip

Step 4: Move the terraform file to /usr/local/bin using this command
sudo mv terraform /usr/local/bin

Step 5: Verifying whether it is installed or not

Go to command prompt and type:

terraform -version

```
ubuntu@ip-172-31-7-235:~$ terraform --version
Terraform v0.13.2
ubuntu@ip-172-31-7-235:~$
```
